# CENTRAL VACUUM UNIT WITH DUST BAG OPTION

In order to utilize the central vacuum units with filter bag, it's neccessary to remove the HEPA and Pro-Tecta filter housing

1. Remove the 6 screws securing the Hepa and Pro-Tecta filter housing
2. Remove the filter housing and the motor filter holder
3. Re-install the motor filter holder using the 6 short screws provided
4. Check that the motor filter is positioned correctly
5 Install the filter bag couplers (two pieces) and the filter bag as it's explained in the user guide and showed avobe.
